

# Documented Accuracy in Player Projections

One of the ways we **measure success** is comparing what **direction a player's performance took** during the forecasting season.

We could tell you that we exactly predicted Josh Hamilton's 38/120 season in 2011, but in essence projecting any exact statistic is pure luck. On the other hand, predicting that Hamilton's production would increase in 2011 versus his prior season....was not.

The analysis below measures fantasy points per game for the designated period. The focus of this analysis **is to measure our ability in forecasting whether a player would have a better or worse fantasy season than the previous year**. We base this analysis on an indicator called FPI. Fantasy Production Indicator measures a players fantasy contribution based on each At Bat or IP.

Fantistics Correctly Predicted the Fantasy Direction on 7 out of 10 Hitters in 2011

Year 2011 - Projecting Top 200 Hitters - Directional (based on FPI)
